Personal Statement

I'm currently working towards a change in career into the IT/Technology industry, specifically software engineering. I'm currently learning C# and Java through online training and have a portfolio of personal projects ongoing. Have recently completed a weeks voluntary work with a developer team at a finch company in Wales and a weeks voluntary work with the IT service desk at ASOS. I'm currently looking for a full time entry level IT position.

Through my previous employment I believe that there are many transferrable skills that may bring value to the industry. An example of this is, attention to detail and a logical approach is required when diagnosing complex faults.

I'm passionate about everything technology, I'm driven, self-motivated and keen to personally develop. I love to be creative and to solve problems, that is what has drawn me to the Technology industry.

Technical & personal Skills

Beginner to intermediate knowledge of C# and java software development languages.

Beginner to intermediate knowledge of HTML and CSS Web software development languages.

Beginner knowledge of Javascript Web software development language.

People and management skills - Good communication skills, experience in managing and motivating a small group of people to ensure daily objectives are complete to a high standard and within time frames, experience in job allocation

Customer care – personal presentation, polite and helpful manner, good working practices, professionalism, high standards. Invoicing, taking payment, liaising with customers, taking bookings

Diagnosis, maintenance and repair of complex electrical, mechanical and air-conditioning faults, taking over incomplete work, problem solving. Identifying/ordering parts. Finding manufactures specifications and procedures necessary to adhere to industry standards and expectations

Achievements and responsibilities

On completion of my recent work experiences, I received very good feed back and references, for more info, check out my linkedIn profile at :

www.linkedin.com/in/daniel-hunter-61293514b

I worked in the motor vehicle industry for 15 years. I started with a work experience placement from school at an independent garage and worked my way up to a master technician for a well known multi franchise main dealership.

In my most recent employment, my main role was the day to day running of the workshop on the Fiat brand including work and time management, talking to customers to ensure all concerns were correctly handled, pre-ordering parts, warranty and recall work etc.

I was in charge of all diagnostic work and quality checking the work of other technicians on the Fiat brand. I was also an MOT tester and AirCon technician and occasionally worked in the office as workshop controller.

Education

Course title

Grade

Solo learn Java Tutorial Course

Solo learn C# Tutorial Course

Solo learn HTML Tutorial Course

Solo learn CSS Tutorial Course

teamtreehouse.com - Java basics & Java objects.

teamtreehouse.com - C# basics & C# objects.
